

# Business Analysis and Valuation

Cash Flow and Valuation

Prof. Pritabas Mohanty, XLRI,  
Jamshedpur.

[ 1 ]

1

## FCF Valuation Model

$$Value = \frac{FCF_1}{(1 + wacc)} + \frac{FCF_2}{(1 + wacc)^2} + \dots = \sum_{t=1}^{\infty} \frac{FCF_t}{(1 + wacc)^t}$$

Value of Company = Present value of cash flows during the explicit forecasting period + Present Value of Cash flows beyond the explicit forecasting period (**terminal value**)

Prof. Pritabas Mohanty, XLRI,  
Jamshedpur.

## A few starting problems...

- To calendarize or not?
- Stand-alone financials or consolidated financials?
  - What is the difference?
  - Control is presumed to exist when the parent owns, directly or indirectly through subsidiaries, more than half of the voting power of an entity unless, in exceptional circumstances, ...
- Should we use information from equity research reports?
  - By all means, use them... give references ...and never go by the recommendations made in such reports as they are mostly biased.
  - They contain useful information about the industry.
  - Should you use Chat-GPT or Claude, Gemini, or Command R+?
    - Use them, if you want. But write the prompts used, the response obtained, and how the same has been used in the report.

Prof. Pritabas Mohanty, XLRI,  
Jamshedpur.

## Standalone financials or consolidated financials?

|                              | P Limited      | S Limited    | M Limited    |
|------------------------------|----------------|--------------|--------------|
| P Limited's equity Ownership | -              | 80%          | 20%          |
| Net Assets                   | ₹500 million   | ₹100 million | ₹100 million |
| Net Income                   | ₹100 million   | ₹30 million  | ₹40 million  |
| Market Capitalization        | ₹1,000 million | ₹300 million | ₹400 million |

- Valuation if you start from standalone financials...
- Valuation if you start from consolidated financials...
- Differences
- Which method is better?

Prof. Pitabas Mohanty, XLRI,  
Jamshedpur.

6

## Controlling More than 50% shares

- **Control and Consolidation:** Holding more than 50% of the shares typically signifies that the parent company has control over the subsidiary. When control exists, the parent company is required to prepare consolidated financial statements, presenting the financial position, results of operations, and cash flows of the parent and subsidiary as if they were a single economic entity.
- **Consolidated Financial Statements:** Consolidated financial statements combine the accounts of the parent company and all its subsidiaries into a single set of financial statements. This means that the assets, liabilities, equity, revenues, and expenses of the subsidiary are combined with those of the parent company.
- **Elimination of Intercompany Transactions:** In the consolidation process, intercompany transactions, balances, and profits or losses on transactions between the parent and subsidiary are eliminated.
- **Proportional Ownership:** The portion of the subsidiary's equity that is not owned by the parent company is known as non-controlling interest (NCI) or minority interest. This portion is presented separately in the consolidated financial statements to indicate that there are other owners of the subsidiary.

Prof. Pritabas Mohanty, XLRI,  
Jamshedpur.

[ 7 ]

7

## When you hold between 20-50% of the shares: Equity Accounting

- **Initial Recording of Investment:** When a company invests in another entity and it meets the criteria for using the equity method (generally a long-term investment representing a stake of 20-50% ownership), the investment is initially recorded at cost, which includes the purchase price plus any directly attributable costs.
- **Proportionate Share of Income/Loss:** After the initial recording, the investing company adjusts the carrying value of the investment to recognize its share of the investee company's earnings or losses. For example, if Company A owns 30% of Company B, then Company A would report 30% of Company B's profits or losses in its own income statement.
- **Adjustments for Dividends:** When the investee company pays dividends to the investing company, the dividends are recorded as a reduction in the carrying value of the investment.

Prof. Pritabas Mohanty, XLRI,  
Jamshedpur.

## Maintaining Consistency in Assets & Liabilities & Cash Flows & WACC

- Start with Liabilities (find WACC).
  - Remember to make a note of liabilities that were excluded while computing WACC.
- Divide assets into operating and non-operating assets. It has nothing to do with how accountants divide assets into operating and non-operating assets. It depends on your valuation objective.
  - FCF must be generated from operating assets only.
  - Remember to add back market value of non-operating assets at the end to PV of FCF to obtain the enterprise value.

Prof. Pitabas Mohanty, XLRI,  
Jamshedpur.

## May need to restate previous years' figures

- We need a base number to forecast future sales.
  - Walmart International revenue fell from \$121.4bn in 2021 FY to \$101bn in 2022 FY.
  - It sold Asda (UK) and Seiyu (Japan) during the year.

Prof. Pritabha Mohanty, XLRI,  
Jamshedpur.

India cement crossed ~490 MT in FY26 (+9% YoY) — its largest demand year on record — while the sector's most...

**VestAI Research** Updated 2026-07-06 14 min read 24 companies

**TL;DR** — India cement crossed ~490 MT in FY26 (+9% YoY) — its largest demand year on record — while the sector's most... Key figures: ~490 MT Cement demand FY26 (+9% YoY, record) and ~660 MTPA Industry capacity; ~72% utilisation FY26. This report screens every listed Cement & Materials name on cash conversion, balance-sheet quality and valuation.

### ~490 MT

Cement demand FY26 (+9% YoY, record)

### ~660 MTPA

Industry capacity; ~72% utilisation FY26

### ₹87,384 cr

UltraTech revenue FY26 (+17%); EBITDA ₹17,598 cr +32%

### 73.7 MT

Ambuja record volume FY26; EBITDA +3% to ₹6,539 cr

### 160-170 MT

New cement capacity FY26-28 — biggest wave since 2013

## Other Operating Income

- Questions to be asked...
  - Is this part of the main business activity of the company?
  - Is this a recurring income?

|                             |     | Is this part of the main business activity of the company? |                               |
|-----------------------------|-----|------------------------------------------------------------|-------------------------------|
|                             |     | Yes                                                        | No                            |
| Is this a recurring income? | Yes | Treat as Operating Income                                  | Treat as Non-operating Income |
|                             | No  | Ignore                                                     | Ignore                        |

### Examples (Operating or non-operating?):

- Income from credit card operations by a retail firm
- Drug retailer gets revenue from selling containers
- Income from Investment Income (trade vs. non-trade)
- Gain on sale of assets

Prof. Pitabas Mohanty, XLRI,  
Jamshedpur.

## Definition

$$\text{Total Operating Income} = \text{Net Sales} + \text{Other Operating Income}$$

Prof. Pitabas Mohanty, XLRI,  
Jamshedpur.

( 24 )

24

## Operating Expenses (Opex) line items...

- Raw materials
- Wages and salaries
- Other manufacturing expenses
- Selling and distribution expenses
- Administrative expenses
- Other expenses (put all smaller items here)
- Depreciation
- Compute the % of total sales (or fixed assets) over the last 3-5 years
- Compute EBITDA and EBITDA Margin

Prof. Pitabas Mohanty, XLRI,  
Jamshedpur.

## Estimating NOPAT (Net Operating Profit Adjusted for Tax)

- Also known as NOPLAT by some consulting firms
  - Net Operating Profit **Less** Adjusted Tax
- For historical financials, use the cash tax rate. For projections, use the current statutory tax rate.

|                      | 2019            | 2020            | 2021            | 2022            | 2023            |
|----------------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| Revenue              | 19,069.97       | 20,009.64       | 20,602.00       | 27,210.00       | 38,270.00       |
| <b>EBITDA</b>        | <b>2,002.21</b> | <b>2,417.73</b> | <b>1,701.00</b> | <b>3,298.00</b> | <b>4,796.00</b> |
| Net Operating Income | 1,863.32        | 2,108.04        | 1,370.00        | 2,951.00        | 4,432.00        |

## Estimating Gross Investment

- Computing Capex from financial statements
- Computing increase in operating working capital
  - Operating and Non-Operating Cash
- Items to include in current liabilities
  - What about short-term debt?
- Working Capital for Bharti Airtel as at 31 March 2022
  - Inventory: 4 Million
  - Receivables: 51,525
  - CMS: 3,303
  - Payables and Deferred Revenue: 303,018

Prof. Pritabhas Mohanty, XLRI,  
Jamshedpur.

## Gross Investment of Titan

|                            | 2019  | 2020     | 2021   | 2022   | 2023   |
|----------------------------|-------|----------|--------|--------|--------|
| Net Fixed Assets           | 1,095 | 2,067    | 1,984  | 1,996  | 2,288  |
| Change in Net Fixed Assets |       | 972      | -83    | 12     | 292    |
| Add: Depreciation          |       | 138.89   | 309.69 | 331.00 | 347.00 |
| Capex                      |       | 1,111.16 | 226.44 | 343.00 | 639.00 |

Capex will often be lumpy for most companies.  
While forecasting capex, try to link it to your revenue drivers.

Forecasting Capex for Titan:

- Link to number of stores planning to set up.
- If the company plans to increase outsourcing, then it will also affect its capex.

Prof. Pritabhas Mohanty, XLRI,  
Jamshedpur.

## Definitions

**Operating Invested Capital (OIC)**  
**= Operating FA +**  
**Operating Wkg. Capital +**  
**Other Operating Assets**

Essentially operating invested capital is used to generate the NOPAT for a company.

$$ROIC = \frac{NOPAT}{Operating \text{ Invested } Capital} \dots 5(14)$$

Prof. Pitabas Mohanty, XLRI,  
Jamshedpur.

{ 36 }

36

## Definitions

$$\text{EVA} = \text{Operating Invested Capital} \times (\text{ROIC} - \text{WACC})$$

$$\text{OIC} \times (\text{ROIC} - \text{WACC}) = \text{OIC} \times \left( \frac{\text{NOPAT}}{\text{OIC}} - \text{WACC} \right) = \text{NOPAT} - \text{OIC} \times \text{WACC}.$$

Prof. Pitabas Mohanty, XLRI,  
Jamshedpur.

[ 37 ]

37

## Growth Rate...

- OIC as on 31 March 2013 = ₹100m
- ROIC = 20%
- Investment rate = 25%

$$\text{Investment Rate} = \frac{\text{Net Investment}}{\text{NOPAT}}$$

$$g = \text{ROIC} \times \text{Investment Rate}$$

Prof. Pitabas Mohanty, XLRI,  
Jamshedpur.

[ 38 ]

38

## Valuation using EVA Method

- OIC as on 31 March 2022 = ₹100m
- ROIC = 20%
- Investment rate = 25%
- What is the enterprise value?
- What will be the value if the growth rate is 0?
- What is the value, if the growth rate is 10%?

$$\text{Value} = \text{OIC} + \text{PV}(\text{EVA})$$

Prof. Pritabas Mohanty, XLRI,  
Jamshedpur.

[ 39 ]

39

## Where to Invest?

- Operating Invested Capital = Rs.100 million
- Cost of Capital = 15%
- Projected Growth Rate = 5%
- The ROIC of
  - Company A is 10%
  - Company B is 15%
  - Company C is 20%
- Where will you invest?

Prof. Pritabas Mohanty, XLRI,  
Jamshedpur.
